Subject: Re: NAVIG Response to Complaint/Request, Case# 20050489

**Dear "NAVIG Response to Complaint/Request, Case# 20050489",**

**Thank you for your Email bellow;**

**I have read carefully your entire web site. None of the procedures you recommend is fitting my complaint because of the following reasons:**

**1. Your guidelines fails to accept complaints that address the entire Navy where ever it is.**

**2. Your guidelines does not provide for accepting my web site documents, and I can not afford half a million pages to copy and to mail you. I have over forty large boxes in storage, that the documents are stored, and you are welcome to take responsibility over them. You can have a copy of these documents on seven CDs, which you seams to be not so egger to receive, or provide guideline to receive them.**

**3. You are brushing me away the second time with formal excuses, when we are running out of time, and when you are responsible for my Nation safety and my family safety [world wide]. Please read my web site and stoop find excuses not to process this complaint.**

**Believe me when N. Korea launch a missile, and/or China, and/or other countries, especially a tumbler war head, on Navy forces [where ever they are] you are NOT protected, and you are running of time, and you are playing games with me.**

**The enemy identified in the NMD EKV TRD are having warheads with shape, material, reflector and more that can be changed in three months, and your response time to these changes is over 1.5 years. So please, no more games, go and assure strong America.**

**God Bless America.**

**Regards, Dr.Nira Schwartz -- Case# 20050489**

This is in response to your June 28, 2005 e-mail to the Office of the Naval Inspector General in which you request that we review your **ENTIRE** website regarding your complaint instead of brushing you away.

Please refer to our website at [www.ig.navy.mil](http://www.ig.navy.mil) regarding the appropriate process on how to prepare a complaint for submission to our office.

We hope this information is of assistance.

Dear M. L. Fair - Captain US Navy,

I confirm your letter to me dated 28 June 2005;

Yes, I did identified specific alligations under my Email subject:

"Complaint - US Government Corruption - Fraud - Waste and Abuse -- please help

<http://www.niraschwartz.com>

..."

Please read my **entire** web site; I have invested 9 years in this complaint [since 1996]; and I have invested over three months and over 500 hours to put the relevant documents on my web site; The documents that prove US government Corruption - Fraud - Waste and Abuse;

I have personally informed the Navy during the year 2000, in front of GAO Investigator Mr. Ghoshroy while at MIT, that the NMD EKV technology is Fraud and false technology that will not comply with the laws of physics and will never work; And what is the Navy response? No one even cares to read my web site; The False technology goes into production; and the government lies to the people that we are protected against atomic attack [especially Tumbler from N. Korea] while using the NMD EKV technology;

Please be advised that I have seven CD's with additional documents that prove my complaint. Let me know if you wish to have them.

For your responsibility for secured America, and secured Navy forces, please read my web site instead of brushing me away;

I highly advised that you will communicate with Mr. Ghoshroy, and Mr. Blumenfield [email above].

Regards,

Dr.N.Schwartz
