Torrance, CA. 90503

Dear Dr. Schwartz,

I am enclosing two packages of information which you sent to Dr. Sheldon Wald of the former Hughes Missile Systems Company. The first package was received at our Security offices in Tucson, Arizona on December 4, 1999 and the second was received on December the 17th. Neither Dr. Wald nor any other Raytheon employee in Tucson read the documents contained in either of your packages. I have briefly reviewed them to confirm that they did not contain any documents protectively marked as "Proprietary", "Competition Sensitive" or "Classified".

Other than the limited review described above, your packages are returned without action. If you believe that there are or have been improprieties in connection with any federal program, I recommend that you continue to pursue the matter through appropriate governmental agencies.

Sincerely,

David L. Fowler

co/ Dr. Sheldon Wald - Project Manager of the EKV (Exo Atmospheric Kill Vehicle project.

TEL: 520-794-4276

Dear Dr. Wald,

Please be my expert in evaluation of the enclosed unclassified reports.

Please note that Boeing/TRW still continue their work on the EKV project waiting for you to be late.

Please note that whether you are late or not, the Boeing/TRW technology does not work and will not work, and additional spending money on it are wrong.

Sincerely,

Dr. Schwartz
